Mentoring the Mentor

Mentor goals:
- To declare what is possible and establish a commitment to that possibility
- Address personal and professional barriers limiting the ability to serve
- Evolution of vision/mission/ethics that drive success
- Create immediate action steps to apply learning and growth
- Construct the round table of applied trophologists

Mentoring the mentor:
- Who are the mentors? - Practitioners
- Who are we mentoring? - Patients and GAP
- What's the purpose? - Optimized life
- How does it work? - Whatever you learn you teach someone else (anyone else)
- Who's is included? - Self selection, you pick yourself
Mentoring the mentor:

- Each participant attends monthly teleconferences (1 hour in duration, 4th Thursday of month) creating a round table discussion/exploration of the dynamics and details of a nutrition-based holistic practice.
- Each participant chooses a colleague in his/her world to convey the notes and information—not information squandering.
- Issues/problems/questions are considered a learning process for everyone, although individual's remain anonymous.
- All questions, comments, case studies to be directed through email to SP rep who will compile and include in next teleconference (must be submitted 10 days prior).

Success -
The ones who risk - win!

Motto of Special Forces of the British Air Force

Right or Wrong -
I do the very best I know how - the very best I can; and I mean to keep doing so until the end. If the end brings me out all right, what is said against me won't amount to anything. If the end brings me out wrong, ten angels swearing I was right would make no difference.

Abraham Lincoln
Revisiting the paradigm of disease
- All disease processes are intelligent, directed processes.
- Disease processes equal healing processes.
- All disease processes either kill the organism or make it stronger; either way it brings change.
  - "That which doesn’t kill us makes us stronger." - Nietzsche
- When someone is diseased, we’re meeting someone dominantly in a state of change.

Change happens!
How can we support the change?

Imminent change.
Old paradigm:
- Suppress symptoms
- Suppress change
- Prolong change
- Delay evolution

New paradigm:
- Support and encourage the change
- Address any shock resulting from the change
- Complete the disease process
- Accelerate evolution

(At least autoimmune diseases will be alleviated until this new paradigm emerges. Over 2,000 named autoimmune diseases, new classifications of 300 per year)

Show up -
Life only demands from the strength you possess.
Only one feat is possible – not to run away.

Dag Hammarskjold
Slide 13

The healer's journey

Therapeutic rationale – why/what are we doing?

Racial Possibility

Confidence builds in the law and the ability to normalize

Results achieved are demonstrated to practitioner and patient

Take on greater challenges – expand the scope of practice, raise the bar, set the standard

Slide 14

Observed thought changes

Slide 15

Observing my path

Initially overwhelmed by all the data, disempowered like everyone else – educated to outcome, but not to real intervention of changing outcome.

At some point in time begins to awaken to possibility of positive change – one can create change and intend it according to repeatable principles.

Always the underlying wisdom of not taking on too much, as failure is not a lesson we inherently want to learn.

Began to know the landscape of what is possible and what isn't.

New data contaminates the paradigm and urging new thought comprehending toward new opportunities.

Experimentation in the face of new data results in a new understanding of dependable principles.

Life process supplemented by intrinsic urgency – people's lives and happiness depend on applying what we learn.
Slide 16

Knowing the path

- Eventually the disguise of 27,000 distinct diseases unmasks itself to us and we see simply foundational imbalances elaborating differences.
- As practitioners who understand how to repair the body and regain homeostasis we must have a sense of knowing what is vital and what is superfluous.
- Pillars of Health - our personal journey compels us to share others what we have discovered.

7 Pillars of Health

---

Slide 17

Healing practitioners develop wisdom

- Our patients introduce us to a great diversity of life.
- Each person we choose to relate to.
- Through relatedness we know compassion and insight.
- This dispels judgment and all that separates doctor and patient, and fosters love, understanding, connection, wholeness, and healing.
- After a while we see ourselves in everyone - people love to be seen in the light.
- And we understand what will help.

---

Slide 18

Willing to lead -

- For many it is a waste land of severe confusion.
- People are searching for truth and reality.
- Too many practitioners have been reduced to hedonistic therapists, unwilling to assist another through a transformative process resulting in empowerment and emancipation this side of heaven.
- Make the recommendation clearly, then honor the individual choices.
**Stress – Allostatic Load & Hormesis**

Stress is a condition of human existence and a factor in the expression of disease. A broader view of stress is that it is not just the dramatic stressful events that exact their toll but rather the recurring events of daily life that elevate levels of physiological systems to cause some measure of wear and tear. It is not the impact of life’s experiences but also of genetic load, health habits, and developmental experiences that contribute to allostatic load.

Hormones associated with stress and allostatic load protect the body in the short run and promote adaptation, but in the long run, allostatic load causes changes in the body that lead to disease. Among the most potent of stressors are those arising from competitive interactions between animals of the same species, leading to the formation of dominance hierarchies.

Hormesis describes that appropriate stress increases health!

---

**Spam & Confusion**

- "The Case Against Vitamins" in Wall Street Journal 3/20/06 is an absurd inability to understand the data and what it is saying.
- Similar studies show that communicating with your wife and friends can lead to loss of intimacy.
- Vitamins are vital, deficiencies lead to disease – why are we forgetting what we already know?
- Upon reading the article one thing immediately jumps out to those who understand functional physiology - isolated nutrients (usually synthetic forms) contribute to imbalance.

---

**#1 Practice builder**

- Results refer
- Results refer year after year – they never stop
- Results are never forgotten
- Results are respected by other professionals
#1 Manifesting change
- Results equal change
- The ability to manifest and document change
- The ability to lead into change while managing the fear surrounding the shift
- The ability to strategize change

Master of Change
- If you can create change and steward it effectively for people, you are a wizard to the people you serve
- Secretly, all people desire change because they know beyond denial that they are not fulfilled and slightly or severely unhappy with things as they are
- Yet people are afraid of change—Why?
- Because of what they learned as children about the change process:
  - Loss of stability
  - Out of control
  - Powerless
  - Unsupported
  - Emotionally flooded
  - The unknown
  - Things can go wrong
  - Breakdown before breakthrough before betterment
  - Change equals death, with no perception of resurrection

The Experiment
- Everyday is an experiment—people are very experimental if you can demonstrate safety and gain (what did we learn)
- Experiments are a success regardless of outcome—whether healing happens the experiment proves something
- Explain, “I learn by what works and what doesn’t work—both outcomes tell me about you and how your machinery works”
- Handout paper “The nutritional experiment”
Slide 25

Complete Tropho-Restorative Cycles

Circulatory Status

Immune Burden

Inflammatory Status

pH Bioterrain

Glycemic Management

Endocrine Hormonal

Slide 26

7 Pillars of Healing

- Endocrine/Hormonal - Disruption & Depression
- Glycemic Management - Insulin/Cortisol Dysregulation
- pH Bioterrain - Net Acid Excess
- Inflammatory status - Cumulative Repair Deficit
- Immune burden - Toxicity, Infection & Infestation
- Circulatory Status - Arterial, Venous & Lymphatic Competence
- Complete Tropho-Restorative Cycles - Uninterrupted Processes of Repair, Fortification & Synchrony

Slide 27

7 Pillars of Healing

The possibility of human greatness (all manner of healing)

7 Complete Tropho-Restorative Cycles - Uninterrupted Processes of Repair, Fortification & Synchrony

Genetic physiological genius
People’s inherent possibility -

The surest way to reveal people’s character is not through adversity but by giving them power

Abraham Lincoln

Liver Phase I/II (III) Detoxification

- CYP enzyme system is used to eliminate drugs, toxins, unwanted substances, biological agents, and nutrients
- Phase I: oxidation, reduction, hydrolysis, conjugation
- Intermediates with potential for secondary tissue damage: reactive oxygen intermediates (Folic Acid, B12, B6, C, AA, and then antioxidants to protect from intermediates only)

- Phase II: sulfation, methylation, glucuronidation = polar water-soluble molecules
- Essential for detoxification; green tea, grapefruit, support, and synthetic bacterial = subjective fiber as a non-endproduct

- Phase III: Antipporter: - a recirculation process not yet accepted scientifically, active efflux pump decreasing intracellular concentrations of xenobiotics allowing for a "second-pass" with the detox enzymes located at or near the cell membrane controlled by MRP1, MRP2, MRP3 genes (Multidrug Resistance genes; more concentrated presence in cancer cells, liver, kidney, pancreas, intestines, brain, testes)

- Support Phase I & II with Folic Acid (2), Fortil/B12 (2), Catapl (4), Riboflavin, Niacin, B6, C, Cruciferous Complete (2), SP Complete (2 Tbsp), H2O (minimum 48 oz)

Detox - Phase I & II

- Homocysteine support, B2, B3, B6, Glutathione, AA, Flavonoids, Phospholipids
- Homocysteine support, Glycine, Taurine, Glutamine, NAC, Cysteine, Methionine
- Cruciferous Complete (2), Folic Acid (2), Fortil/B12, B6 Niacinamide, SP Complete, H2O (minimum 48 oz)
A Clinical Study - Infection

Virgil (83 years old) originally entered office on 6/18/99 for severe hospital acquired infection of left leg with amputation recommendation — extensive supplementation resulted in complete recovery with no surgery.

Under maintenance care for seven years until three months ago began to decline in strength, ankle swelling, loss of stamina and wind, severe respiratory infection.

Trial various supplementation all of which improved but did not resolve the condition — finally cardiologist determined need for catheter study.

Study showed dramatic improvement in heart circulation since last study 3 and 8 years ago, yet revealed severe declining ejection fraction (21%) and suggestion of heart failure and need for transplant.

Medicine gives up and of course we try out of decency — results occur quickly and decisively.

Cardiomyopathy usually due to virus that attacks the heart muscle supported especially by Cataplex AC (12)

Wormwood (4) especially useful to support immune challenges with resistive mycoplasmic infection

Comprehensive protocol included Cataplex AC (12), Cyruta Plus (8), Immuplex (6), Thymex (10), Sesame Oil (8), Allerplex (12), Broncafect (6), Colloidal Silver (4 tsp)

Heart condition + virus = debilitation

No condition + virus = protracted fatigue

Everyone is getting this — whether or not outward signs of sickness (immune up-regulation) occur the burden of meeting this is real and widespread.

Reversing heart disease
How do we live?

Without belittling the courage with which men have died, we should not forget the courage with which men ... have lived. The courage of life is often a less dramatic spectacle than the courage of a final moment; but it is no less a magnificent mixture of triumph and tragedy. A man does what he must — in spite of personal consequences, in spite of obstacles and dangers and pressures — and that is the basis of all human morality.

John F. Kennedy

Prove it -

I have a lot of things to prove to myself. One is that I can live my life fearlessly.

Oprah Winfrey

Ultimate and Only Barrier

Fear

Only technique for breaking through — face the fear.
Slide 37

Only 2 fears -

- Someone may take what I have
- Someone may not give me what I want

Slide 38

Only 1 answer -

- I give myself whatever I need and want in order to fulfill my mission, because...
- I love me that much
- Perfectly
- Honestly
- Compassionately

Slide 39

Exceeding the Fear

- The first step is to realize you create all of your own fears
- The second step is to realize you can uncreate all of your own fears
- The third is to realize all the untapped truth behind your fear (e.g., fear of dying is really unclaimed passion to live)
Eternal Truth

You need not do anything. You need not leave your room. Remain sitting at your table and listen. You don’t even need to wait; just become still, quiet, and solitary, and the world will freely offer itself to you to be unmasked. It has no choice; it will roll in ecstasy at your feet.

Franz Kafka

Practitioner limitation

- Lack of personal experience and relatedness
- Lack of awareness of other’s needs
- Lack of education/training
- Resistance to change
- Prior vows
- Fear of the power
- Money mismanagement
- Lack of vision/mission

Take my/your supplements – Physician heal thyself

Be compassionate – listen and relate!

Learn – let the rep work for us

Get up – we never were in control

Drown everything but truth

I am power that made me will heal me

Pay the bill first – then spend the profit

Let the legacy live me – see it in others, find it in myself

Free -

You shall be free indeed when your days are not without a care nor your nights without a grief. But rather when these things girdle your life and yet you rise above them naked and unbound.

Kahlil Gibran
Practitioner Take-downs

- Onset of disease & dying after care (osteoporosis, cancer, CAD) - self-blame!
- Other competitive practitioners - defend yourself!
- New research, new techniques - prove it!
- Broken promises - loss of trust!
- Money $ - disempowerment!
- Control - energy competition!
- Risk of failure - lack of faith!

Cause & Effect

- If you are identified with cause, you will burn out from being responsible and guilty
- You are not the cause of healing or of disease
- You are not the cause of your successful practice, nor of getting patients to come to you

Cause arises from consciousness

- Thoughts are thought to cause actions, but what causes thoughts
- Consciousness creates thought as clothing for spiritual intentions of being
- As such we do not try to manipulate or change these intentions but rather honor and respect them - 'a priori'
Action steps for tomorrow

- Consider every patient interaction as possibly evoking something in yourself.
- Prepare your sequential immune up-regulation strategy using the 7 pillars system to achieve results as yet unanticipated by modern science.
- Develop your system for functional explanation.
- Prepare to try even when your mind and learning tell you it is not possible to effect the outcome.
- Patients want to try – give them a chance.
- Prepare handout “Nutritional Experiment”.
- Admit what you learn and prepare to apply the principles with others – see the pattern in everyone – need less exaggerated problems to help more subtle outcomes – your practice is teaching you and developing you.
- Prepare to have the validation studies prove the merit of what you do (hopefully before your death).

Eternal Truth

He who does not use his endeavors to heal himself is brother to him who commits suicide.

Proverbs 18:96

Give generously
As you have received
